DATA DESCRIPTION- ANSWER KEY				
Column	Column Header	Description Column Header	Required or Optional	Accepted Data Values
Top Row	PWS ID	Uniquely identifies the water supply within a specific state- 9 digit Number Example MS0830001	REQUIRED	Unique ID for public Water Supply
Top Row	PWS Name	The name of the water supply.	REQUIRED	Name of the Public Water Supply
Top Row	Date of Current Inventory	The date of current Inventory.	REQUIRED	Date
Top Row	Official Ownership of service line Policy	Who owns the Service line-Water Supply, Customer , Both Water Supply and Customer.	REQUIRED	Public-PWS, Private-Customer , Private and Public
A	SYSTEM SPECIFIC ID Optional (such as Billing ID)	This is an Identifier that your system gives to this service or any # can associate with the address. It might be a customer or account number or any	Optional	Any text or number that can associate with Street address
B	Official Ownership of service line Policy	Who owns the Service line-Water Supply, Customer , Both Water Supply and Customer.	REQUIRED	Public-PWS, Private-Customer , Private and Public
C	SERVICE ADDRESS	Actual Street location address of service line. NOT the billing address that may be a location other than service location.	REQUIRED	Address of the actual street location with Zip code

DATA DESCRIPTION- ANSWER KEY

Column	Column Header	Description Column Header	Required or Optional	Accepted Data Values
D	LEAD CONNECTOR CURRENTLY PRESENT? (E.G., GOOSENECK, PIGTAIL, OTHER)	Material or Composition of flexible connector between the water main and service line. May be a gooseneck, pigtail or flexible tubing to prevent shearing of connection or to change elevation between main & service.	REQUIRED	Y, N, UN
E	PWS-OWNED SERVICE LINE MATERIAL	What is the material or composition of existing service line owned by public water system?	REQUIRED	L, G, C, P, O, UN, UB, UX, UL, COM
F	PRIVATE SIDE SERVICE LINE MATERIAL	Material or composition of privately owned service line. This is required by the rule. PWS may need to observe line material in meter pit if possible or speak to the resident about pipe entry into structure. Photos of service entrance may help identify piping.	REQUIRED	Lead, Galv, Copper, Plastic, Other, Unknown, Unknown after 88

G	VERIFICATION SOURCE	What verification source is used to identify the service line material- records, field or visual inspection, building code, statistical analysis, construction permit ,pipe diameter, local lead ban date, lead ban after 1988 etc.	REQUIRED	Any value
H	IF GALVANIZED LINES INVOLVED, WAS LEAD EVER UPSTREAM OF THIS SERVICE LINE? (EXCLUDE CONNECTOR)	Was lead piping ever located upstream of this service. This would include lead pipe that was removed during upgrades or main replacements.	REQUIRED, IF Galvanized Lines are involved	Y, N, UN

DATA DESCRIPTION- ANSWER KEY

Column	Column Header	Description Column Header	Required or Optional	Accepted Data Values
I	WAS PWS-OWNED SERVICE LINE EVER LEAD?	Was the public water supply owned service line ever lead? Even if the service line may have been replaced, it is important to know if lead was ever present due to effect on down stream private side piping.	REQUIRED	Yes, No, Unknown

J	YEAR PWS-OWNED SERVICE LINE INSTALL DATE (Optional)	This is the date the publicly owned service line was installed. Please enter the year of most recent install date if service line has been replaced. Example year:1983	OPTIONAL	Enter Year or UN
K	YEAR-PRIVATE SIDE SERVICE LINE INSTALL DATE	This is the date the privately owned service line was installed. Please enter the year of most recent install date if service line has been replaced. Example year:1983	OPTIONAL	Enter Year or UN

text	GENERAL NOTES	

[fr.gov/current/title-40/section-141.84](https://www.iosdoh.gov/current/title-40/section-141.84)

Description

All Water Systems must develop an initial Inventory by October 16, 2024 and submit it to the primary agency in accordance with 141.90

The inventory must include all service lines connected to the public water distribution system regardless of ownership status(e.g., where service line ownership is shared, the inventory would include both the portion of service line owned by the water system and the customer-owned portion of the service line)

The service line materials inventory must be publicly accessible-The inventory must include a location identifier, such as a street address, block, intersection, or landmark, associated with each lead service line and galvanized requiring replacement service line. Water systems may, but are not required to, include a locational identifier for lead status unknown service lines or list the exact address of each service line.

The inventory must include all service lines connected to the public water distribution system regardless of ownership status(e.g., where service line ownership is shared, the inventory would include both the portion of service line owned by the water system and the customer-owned portion of the service line)

Description

The water system must replace any lead gooseneck, pigtail, or connector it owns when encountered during planned or unplanned water system infrastructure work.

Each service line, or portion of the service line where ownership is split, must be categorized in the following manner- (i) "Lead" where the service line is made of lead. ii) "Galvanized Requiring Replacement" iii) "Non-lead" (iv) "Lead Status Unknown.

Each service line, or portion of the service line where ownership is split, must be categorized in the following manner- (i) "Lead" where the service line is made of lead. ii) "Galvanized Requiring Replacement" iii) "Non-lead" (iv) "Lead Status Unknown

141.84(a)Lead Service line inventory: (3) A water system must use any information on lead and galvanized iron or steel that it has identified pursuant to § 141.42(d) when conducting the inventory of service lines in its distribution system for the initial inventory under paragraph (a)(1) of this section. The water system must also review the sources of information listed in paragraphs (a)(3)(i) through (iv) of this section to identify service line materials for the initial inventory. The water system may use other sources of information not listed in paragraphs (a)(3)(i) through (iv) of this section if approved by the State.(i) All construction and plumbing codes, permits, and existing records or other documentation which indicates the service line materials used to connect structures to the distribution system. (ii) All water system records, including distribution system maps and drawings, historical records on each service connection, meter installation records, historical capital improvement or master plans, and standard operating procedures. (iii) All inspections and records of the distribution system that indicate the

(ii) “Galvanized Requiring Replacement” where a galvanized service line is or was at any time downstream of a lead service line or is currently downstream of a “Lead Status Unknown” service line. If the water system is unable to demonstrate that the galvanized service line was never downstream of a lead service line, it must presume there was an upstream lead service line.

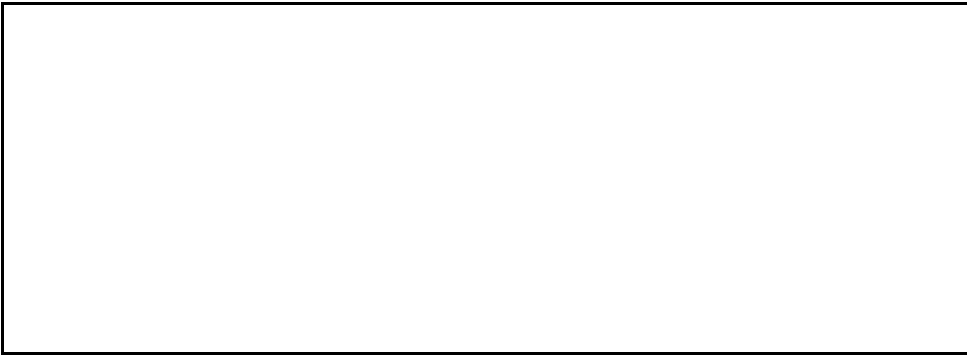

fr.gov/current/title-40/section-141.84

Description

(ii) “Galvanized Requiring Replacement” where a galvanized service line is or was at any time downstream of a lead service line or is currently downstream of a “Lead Status Unknown” service line. If the water system is unable to demonstrate that the galvanized service line was never downstream of a lead service line, it must presume there was an upstream lead service line.

Definition: Lead status unknown service line (40 CFR 141.2)- It is not necessary to physically verify the material composition (for example, copper or plastic) of a service line for its lead status to be identified (e.g., records demonstrating the service line was installed after a municipal, State, or Federal lead ban). And 141.84(a)-3(i-iv)-Lead Service Line Inventory

Definition: Lead status unknown service line (40 CFR 141.2)- It is not necessary to physically verify the material composition (for example, copper or plastic) of a service line for its lead status to be identified (e.g., records demonstrating the service line was installed after a municipal, State, or Federal lead ban). And 141.84(a)-3(i-iv)-Lead Service Line Inventory
